

Docker Task -2

Task Description:

Create a dockerfile, docker-compose file which when executed must display your basic details in the website.

Step 1 : Created an EC2 instance and security group with inbound access for 8000 (Host port)

Step 2 : Installed docker and docker compose using the below command

sudo apt install docker-ce docker-ce-cli containerd.io docker-buildx-plugin docker-compose-plugin

```
ubuntu@ip-172-31-26-115:~$ mkdir composetest
cd composetest
ubuntu@ip-172-31-26-115:~/composetest$ vi app.py
ubuntu@ip-172-31-26-115:~/composetest$ vi requirements.txt
ubuntu@ip-172-31-26-115:~/composetest$ vi Dockerfile
ubuntu@ip-172-31-26-115:~/composetest$ vi compose.yaml
ubuntu@ip-172-31-26-115:~/composetest$ docker compose up
unable to get image 'redis:alpine': permission denied while trying to connect to the Docker daemon socket at unix:///var/run/docker.sock: Get "http://%2Fvar%2Frun%2Fdocker.sock/v1.51/images/redis:alpine/json": dial unix /var/run/docker.sock: connect: permission denied
ubuntu@ip-172-31-26-115:~/composetest$ sudo usermod -aG docker $USER
ubuntu@ip-172-31-26-115:~/composetest$ docker compose up
unable to get image 'redis:alpine': permission denied while trying to connect to the Docker daemon socket at unix:///var/run/docker.sock: Get "http://%2Fvar%2Frun%2Fdocker.sock/v1.51/images/redis:alpine/json": dial unix /var/run/docker.sock: connect: permission denied
ubuntu@ip-172-31-26-115:~/composetest$ newgrp docker
ubuntu@ip-172-31-26-115:~/composetest$ docker compose up

=> [internal] load image by direct (no docker)
=> <= reading from stdin 490B 0.03
```

Step 3 : Created a directory for the project:

mkdir composetest

cd composetest

Step 4 : **app.py** which contains the necessary code to run the python web application and redis.

Step 5 : **requirements.txt** contains prerequisites component details.

Step 6 : **Dockerfile** contains the details which we're using to create the image.

Step 7 : **compose.yaml**

Compose simplifies the control of your entire application stack, making it easy to manage services, networks, and volumes in a single, comprehensible YAML configuration file.

Step 8 : With a single command, you create and start all the services from your configuration file.

docker compose up

Step 9 : Access the website using below url

http://44.251.33.55:8000/
